TRAINING MODULES:

Resource Compliance and California Controlled Atmosphere have partnered together to make high-quality training videos to better equip and inform your technicians, operators, managers and team members.

CERTIFICATES:

Each attendee that completes all training modules and passes the training quizzes with an average score of 70% or better will be awarded a certificate of completion for the 2022 Virtual Ammonia Refrigeration Training.

REMOTE FLEXIBILITY:

Online training modules give you the flexibility to work at your own pace. The virtual training videos and quizzes will be available from January 17, 2022 through January 28, 2022. The training modules will be emailed to each facility's contact person on January 17.
